

- How much it has progressed in the past year
- Found some potential networking opportunity
- They can't see my wx stations. COAMPS products are interesting

5. What other topics could have been covered?

- Uses of products and benefits- economic! Management decision
- Web training and online resources session would have been useful
- I look forward to the web training but I think it would have made the day too long
- Comparison of SCCOOS with other sites, "What can you do for me?" and Future Vision: In ten years what do you want to see? Brainstorming
- Come closer to shore
- For now seems fairly complete
- Maybe some more on sea state/swell modeling?

6. What can we do to encourage your future involvement with SCCOOS?

- More integration of SCBPS (Southern California Beach Processes Study) and CDIP. Nearshore Coastal and estuary areas
- Include biological analyses in SCCOOS products, such as oceanographic effects on fisheries
- Provide more details and specifics for how we can help
- Keep me updated on upcoming activities, initiatives, etc.
- 6 month training/refresher training at Coast Guard 2A-2B
- I want to play and see! I look forward to forming a partnership with AIS data. Your San Clemente site for access to our Port San Luis, Santa Barbara, Port Hueneme, El Segundo, Point Fermin, San Diego
- Help us better understand application of tools and data products
- I am committed
- Make SCCOOS relevant to my needs

7. Additional Comments?

- Much of the information obtained from users could have been acquired through email or phone in order to reach a broader group. A less technical meeting that introduces users to products already available- for discussion of what SCCOOS doesn't have or needs to improve on.
- Retain focus on ocean waters
- I look forward to meeting again!
- Nice show. Glad I was invited and see SCCOOS as one of the more valuable resources I have reviewed in a long time. Information available to multiple agencies.
- User interface very important
- Good job
- Talk to Bill O'Reilly about large-mapped data displays
- Terrific lunch tour
