

*SCCOOS brings together coastal observations along the Southern California Bight to provide information necessary to address issues in coastal water quality, marine life resources, and coastal hazards.*

*Working interactively with local, state and federal agencies, resource managers, policy makers, educators, scientists and the general public,*

*SCCOOS will improve our understanding and delivery of coastal observations, and will allow us to better manage our coastal ocean environment.*

# JOIN US!

## Southern California Coastal Ocean Observing System (SCCOOS) Working Group Meeting for Data Providers and Users

*Join us for an overview of SCCOOS, a moderated discussion on optimal monitoring activities and data products, and an individual question and answer session with SCCOOS data managers. Working group categories include:*

*Water Quality*

*Marine Life Resources*

*Coastal Hazards*
